PROFESSIONAL EXPERIENCE

Tavuel July 2025 – December2025

AI Software Engineer (Computer Vision)

- Creation and management of datasets for YOLO models using Roboflow.
- Object detection in video (players, referees, and ball).
- Tracking optimization and ID control.
- Model training and evaluation in Google Colab.

4Geeks January 2025 – June 2025

Software Engineer Full stack

- Development and implementation of internal features (endpoints) using Python, Django, and Postman.
- Creation of modern, adaptable interfaces with Angular, TypeScript, and Bootstrap.
- Container management and implementation with Docker.
- Version control with Git in GitLab and GitHub.
- Integration of external APIs, including Google Cloud Platform services (Buckets, Vision, Functions) and GeminiAI.
- Redesign and automation of modules using AI APIs to map CV upload flows with GCP.
- Integration of a pre-trained model (face-api.js) to automate facial recognition.

Universidad Nacional de Costa Rica February 2023 – July 2024

Junior Developer

- Front-end development using React and Bootstrap, and back-end development with NodeJS and MySQL.
- Project management and adaptation to Scrum within the development team.
- Training team members in agile methodologies.
- Implementation of features for three roles (Administration, Library, Students) with report generation and loan workflows.
- Unit and regression testing for each completed Sprint requirement.

EDUCATION

Universidad Nacional de Costa Rica (UNA) February 2021 - November 2025
Bachelor's Degree in Information Systems Engineering

Universidad Nacional de Costa Rica (UNA) February 2021 - November 2024
Diploma in Programming for Computer Applications

SKILLS

- **Soft Skills:** Problem-solving, effective communication, adaptability, teamwork.
- **Project Management:** Scrum, agile planning, and resource coordination.
- **Languages:** Python, C#, Java, JavaScript, TypeScript, Dart.
- **Technologies and Frameworks:** React, Next.js, Angular, Node.js, Django, FastAPI, Spring Boot, Flutter.
- **Databases:** MySQL, Oracle, PostgreSQL, MongoDB, Firebase.
- **Development and Version Control Tools:** Git, GitHub, GitLab, Postman, Docker, Google Cloud, Firebase Studio, Azure.

CERTIFICATIONS AND COMPETENCIES

- SCRUM Foundation Professional Certificate (SFPC) – December 2024
- 4Geeks Participation Certificate – June 2025
- CIUNA (English course) Level 7 – In progress
- Azure Fundamentals (INA) – October 2025
